BEENISH FATIMA

Chief Traffic Officer
Rawalpindi

MESSAGE

As we reflect on the progress made in November, I am pleased to share that the City Traffic Police (CTP) Rawalpindi remains fully committed and motivated to continually enhance traffic management across the city. Our focus on improving road safety, reducing congestion, and ensuring smooth traffic flow remains unwavering. We have taken significant steps to address key challenges, such as optimizing congestion points, enforcing no-parking zones, and maintaining a visible presence at critical intersections with the deployment of maximum number of traffic wardens. Moreover, our licensing services have been streamlined to serve the public more efficiently, while we also continue to invest in improving the city's traffic infrastructure. With the dedication of our officers and the support of the citizens, we aim to make Rawalpindi's roads safer and more organized, contributing to a more harmonious urban environment for all.

We remain steadfast in our mission to not only improve traffic management but also to foster a greater sense of discipline and responsibility among commuters, ensuring that Rawalpindi's roadways are safer for everyone.

In November, the City Traffic Police Rawalpindi demonstrated strong commitment to road safety and discipline by issuing a total of **64758** challans. These included **692** for no parking, **1729** for signal violations, **757** for one-way violations, and **2685** for lane and line offenses. The department

also addressed **8291** cases of driving without a license, **7096** for excessive smoke emissions, and **1434** for juvenile driving. Additionally, **1349** vehicles were challaned for lacking fitness certificates, and **2318** tickets were issued for route permit violations. Safety efforts extended to motorcyclists with **3294** helmet-related offenses and the issuance of **25914** licenses to the public. This robust enforcement reflects the Traffic Police's continued dedication to improving road safety and order in Rawalpindi.

IG Punjab Visit To Traffic Office And Inauguration Of Mess

In November, the Inspector General (IG) of Punjab Police, Dr. Usman Anwar, made an official visit to the Traffic Headquarters in Rawalpindi. During his visit, the IG inaugurated the newly constructed mess, a state-of-the-art facility designed to cater to the needs of both the staff and the public. This modern mess is fully equipped with the latest amenities and provides a comfortable space for preparing and serving food. It stands as a testament to the department's commitment to improving the working conditions of its personnel and enhancing the services provided to the community.

The newly inaugurated mess is particularly beneficial during high-pressure VVIP duties when hundreds of officers are on their feet managing traffic and ensuring public safety. Providing meals for such a large workforce in real-time is a logistical challenge, but the facility will now make this task more efficient and manageable. With its capacity to prepare and serve meals on-site, the mess ensures that the personnel remain focused and energized during their duties. The IG expressed his appreciation for this thoughtful initiative, commending the Chief Traffic Officer (CTO) for addressing this critical need.

After the inauguration, the IG took a detailed tour of the Traffic Licensing Hall, engaging directly with citizens present at the facility. He inquired about their experiences and sought feedback on the efficiency and transpar-

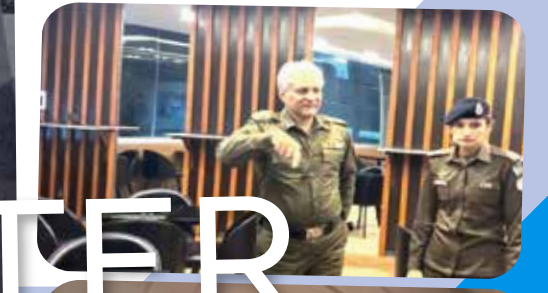

ency of the licensing process. The visitors shared their positive experiences, praising the organized system and courteous staff. The IG's interaction with the public reflected his dedication to ensuring a seamless and citizen-friendly experience at all police facilities.

The IG also acknowledged the strides made by the Rawalpindi Traffic Police in enhancing the infrastructure and overall service delivery. He expressed satisfaction with the advancements in the Traffic Headquarters, particularly the modernized mess and the licensing hall. These improvements reflect the department's ongoing efforts to align its facilities and operations with contemporary standards, ultimately fostering a more productive environment for both the staff and the public.

This visit by the IG Punjab serves as a motivational boost for the entire team at Traffic Headquarters Rawalpindi. His acknowledgment of the initiatives, coupled with his interaction with the public, underscores the importance of continuous development and community engagement. The department remains committed to providing high-quality services, ensuring the welfare of its staff, and fostering a safe and efficient traffic management system for the city.

BEFORE

AFTER

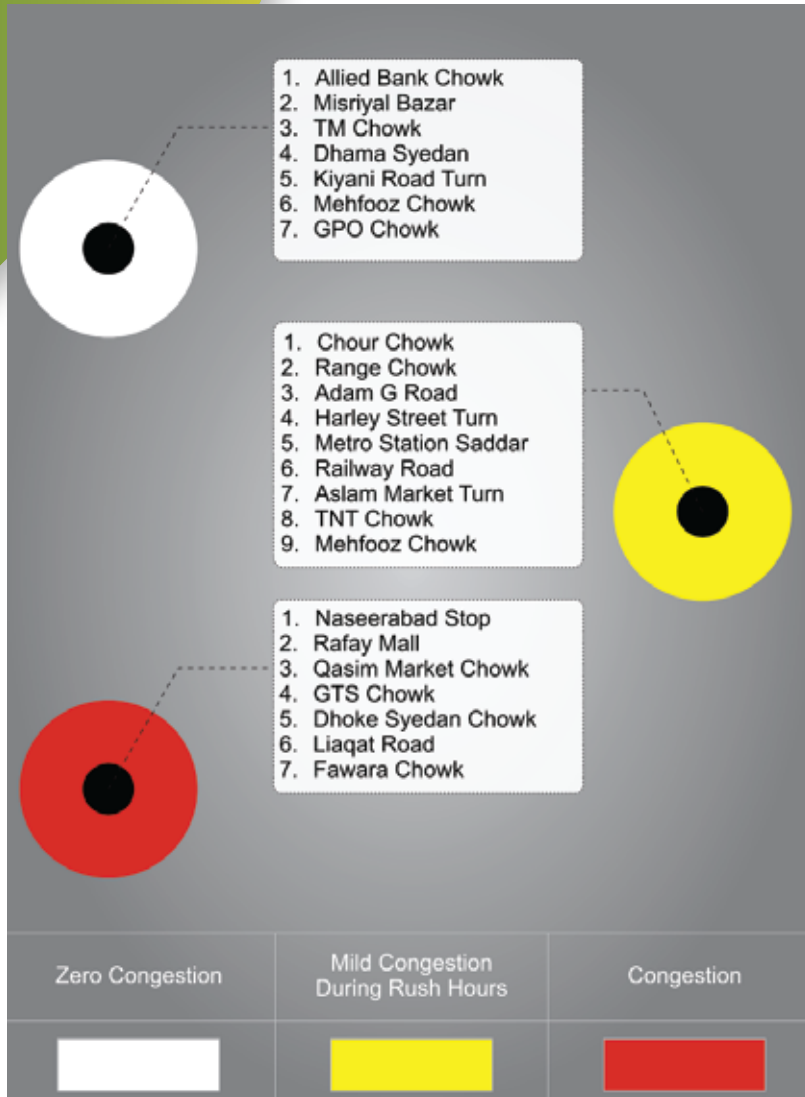

Anti-Congestion Campaign

In November, the City Traffic Police Rawalpindi successfully eliminated traffic congestion in key areas through its anti-congestion campaign. Notable improvements include smoother traffic flow on Allied Bank Road, Misriyal Road, and Kiyani Road, where bottlenecks were effectively cleared. At TM Chowk, DHA Sedan, Mehfooz Chowk, and GPO Chowk, proactive measures reduced delays, enhancing mobility and ease for commuters.

During rush hours, mild traffic congestion has been reported at key points such as Chour Chowk, Range Chowk, Adam G Road, and the Harley Street Turn.

Additionally, areas like Metro Station, Railway Road, and Mehfooz Chowk experience moderate delays, though efforts are underway to manage the flow and improve traffic conditions.

Despite the City Traffic Police Rawalpindi's best efforts, some points still witnessed congestion during rush hours at key points like Naseerabad Stop, Rafay Mall, Qasim Market Chowk, GTS Chowk, Dhoke Syedan Chowk, Liaqat Road, and Fawara Chowk. While no blockages have been reported, the flow of traffic remains slow due to the high volume of school traffic and business activities in these areas as some points like GTS, Dhoke Syedan, Fawara Chowk and Liaqat road are hub of business activities in Rawalpindi. The City Traffic Police is working diligently to remove traffic congestion in these areas in close contact with other departments.

LICENSE SECTION

The City Traffic Police Rawalpindi's licensing campaign in November marked a significant achievement in fostering responsible driving and ensuring safer roads for all. A total of **25914** licenses were issued, reflecting the department's proactive approach to empowering citizens with the proper credentials for safe and lawful driving. Among these, **23748** were for motorcycle licenses, underscoring the importance of ensuring that motorcyclists are properly trained and qualified. The campaign also saw the issuance of **1777** licenses for motor car drivers, **178** for Light Transport Vehicles (LTV), and **211** licenses were issued for motor rickshaws, ensuring that drivers of this vital mode of transport are also equipped with the necessary skills and knowledge.

OUR LICENSING CENTERS AND MOBILE VAN

The main Traffic Headquarters at Qasim Market serves as the central hub, offering comprehensive licensing services for residents of Rawalpindi. In addition, the Cantt Licensing Centre and the Shahbaz Sharif Centre cater to the needs of citizens in key locations, making it easier for people to access services without having to travel long distances. For residents in outlying areas, the Traffic Police has set up additional centers in Gujar Khan, Kahuta, Kallar, and Taxila, extending licensing services to these communities and ensuring that rural and suburban residents are not left behind. To further enhance accessibility, the Mobile Education Van plays a crucial role in the licensing campaign. This specially equipped van travels to various locations across Rawalpindi, bringing the licensing process directly to the people. This innovative approach reflects the City Traffic Police's commitment to public convenience, safety, and promoting responsible driving throughout Rawalpindi and its surrounding regions.

SPECIAL CAMPAIGNS DURING NOVEMBER

The City Traffic Police (CTP) Rawalpindi launched several road safety campaigns in November, focusing on Lane and line discipline, Helmet awareness, PSV fitness, Overloaded school vans, Wrong parking and Encroachment. These initiatives aim to promote road safety and discipline, and create a safer driving culture in Rawalpindi.

PSV Fitness Checking

THE NEWS

'Fall in traffic accidents'

Khair ul Haq
Rawalpindi

Due to the strategy of City Traffic Police, there has been a slight reduction in traffic accidents in Rawalpindi. Strict implementation of traffic rules and awareness of the rules was ensured to prevent accidents at every possible level.

Compared to the previous month, 5 fatal accidents and 2 accidents occurred in the city area in November and 3 accidents occurred in the rural areas, while in the contrary, 10 accidents occurred in Rawalpindi in October, in which 11 lives were lost. In November, 7 accidents resulted in 7 lives lost, which is slightly less than in October. There were also 20 non-fatal accidents in November, in which 23 people were injured, while in October, 27 people were injured in 22 non-fatal accidents.

According to the CTP Rawalpindi, out of the 7 fatal accidents that occurred in November, 5 accidents occurred due to speeding, one accident due to driver negligence and one accident due to brake failure, against whose drivers legal action was also taken.

ACCIDENTS IN NOVEMBER IN RAWALPINDI

In November 2024, Rawalpindi witnessed a concerning number of accidents within areas managed by the City Traffic Police. A total of **7** fatal accidents were reported, leading to **7** tragic fatalities. Additionally, **20** non-fatal accidents occurred, resulting in **23** individuals sustaining injuries. These incidents highlight the ongoing challenge of road safety in a city with a massive and ever-growing population. Despite the tireless efforts of the City Traffic Police to reduce accidents through awareness campaigns, enforcement, and road improvements, the sheer volume of traffic in Rawalpindi continues to contribute to road mishaps.

COMPLETION OF NEW LICENSING CENTER AT SHAHBAZ SHARIF PARK

In a major step towards enhancing public convenience, the City Traffic Police Rawalpindi has inaugurated a state-of-the-art License Center at Shahbaz Sharif Park. This newly constructed facility is fully equipped with modern amenities, ensuring that citizens no longer need to travel all the way to the headquarters to apply for or renew their driving licenses. The center aims to bring ease to the public, offering a wide range of services including license applications, renewals, and other related procedures, all in a comfortable and accessible environment. By establishing this center in the heart of the community, the CTP RWP is making it easier for people to complete their paperwork without the hassle of long commutes.

With this initiative, the City Traffic Police Rawalpindi is further strengthening their commitment to citizen-centered service. The center at Shahbaz Sharif Park is designed to provide a seamless experience, reducing wait times and offering online facilities for added convenience. The new center is a game-changer for residents who can now complete their licensing procedures in a timely and efficient manner, without the need to visit far-off locations.

BEFORE

VISIT OF CTO TO PMAS-ARID AGRICULTURE UNIVERSITY

In a significant initiative aimed at promoting road safety and empowering women, the Chief Traffic Officer (CTO) of Rawalpindi recently visited PMAS Arid Agriculture University. During her visit, the CTO delivered an insightful lecture on road safety, emphasizing the importance of responsible driving and awareness on the roads. As part of the campaign, she also highlighted the Women on Wheels program, a special training initiative for women to learn to ride scooters and bikes. This program is designed to enhance women's mobility, confidence, and independence, all while ensuring safe riding practices.

Encouraging the female students of the university to take part in the program, the CTO urged them to apply and learn bike riding from the trained staff of the City Traffic Police. She assured the students that soon, the university will have its own dedicated Women on Wheels training center, making it even more convenient for the students to get involved. With this initiative, the City Traffic Police aim to empower women by providing them with the skills and knowledge to safely navigate the roads. This visit marks an important step in fostering a safer, more inclusive environment for women in Rawalpindi.

OPEN DAY EVENT FOR STUDENTS OF SAINT MARY COLLEGE

In November, the City Traffic Police (CTP) Rawalpindi hosted an engaging Open Day event for intermediate-level students from Saint Mary College, offering them a unique opportunity to explore the workings of the traffic department. The day began with a comprehensive presentation by the Chief Traffic Officer (CTO) herself, who shared insights into the vital operations of the CTP Rawalpindi. Following the presentation, the students were given an exclusive tour of various departments within the Traffic Police Headquarters, allowing them to better understand the roles of different branches. This hands-on experience helped the students become familiar with the intricacies of traffic management and law enforcement in Rawalpindi, bridging the gap between theory and practical application.

The excitement continued with a visit to FM 88.6, where the students had the chance to participate in a live radio program about their visit. These demonstrations showcased the tools and technology that enable the CTP to maintain order and safety on the roads, leaving the students in awe of the advanced systems in place.

To make the visit even more memorable, the students were invited to showcase their talents through performances such as stand-up comedy, poetry, and singing, with each participant receiving a gift for their contribution. The event also included a fun and educational road safety quiz, where the students tested their knowledge and were rewarded with more thoughtful prizes. The day concluded with a warm gathering at the newly built canteen at the Traffic Head Office, where tea and refreshments were served. Throughout the event, the CTO's leadership and vision for the program were evident, as she ensured the students had a memorable and enriching experience from start to finish. This initiative not only enhanced the students' understanding of road safety but also fostered a positive relationship between the traffic police and the community.

ROAD SAFETY AWARENESS

Road safety is a critical global concern, with over 1.3 million lives lost annually due to road traffic accidents, according to the World Health Organization (WHO). Over speeding contributes to approximately 30% of these fatalities, while distracted driving, particularly from mobile phone use, causes tens of thousands of crashes each year. Following traffic rules significantly mitigates these risks. For instance, wearing a seat belt reduces the risk of death in a crash by up to 45% for front-seat passengers and 50% for those in the rear.

One-wheeling and over speeding pose serious dangers, particularly during the festive season, such as New Year Eve in December in Rawalpindi, when reckless behavior on the roads often escalates. These activities not only put the riders at grave risk but also endanger other road users. Parents, in particular, play a pivotal role in curbing these practices. By instilling road sense in their children from a young age and discouraging reckless behaviors like one-wheeling and overspeeding, parents can prevent tragedies and contribute to safer roads.

Metropolitan cities like Mumbai and Delhi in India, Jakarta in Indonesia, and Istanbul in Turkey offer valuable examples of traffic management. These cities highlight the importance of technology, infrastructure, and civic cooperation in creating safer and more efficient traffic systems—lessons Rawalpindi can learn from to improve its own road safety and traffic management. Civil society in Rawalpindi must actively collaborate with the traffic police to improve road conditions and ensure safer traffic flow.

Due to the irresponsible behavior of parents, a young child, Abdul Ahad, in Kallar Syedan was hit by a bike and was urgently taken to the emergency unit at BBH Hospital in Rawalpindi. In response, Circle Officer Ali Rafique was deputed by the Chief Traffic Officer of Rawalpindi to ensure the child and his family received all necessary support and care. By the grace of God, the child has now recovered and is doing well. This incident serves as a reminder of the critical role parents play in ensuring their children safety on the roads.

Interview with DSP VVIP Azhar Mahmood: Leading the Way in Managing High-Profile Events

Q: DSP Azhar Mahmood, thank you for joining us. You've been instrumental in managing VVIP movements and major events in Rawalpindi. Could you tell us about the challenges and how you successfully managed the Sri Lanka A team's visit to Pakistan in November?

DSP Azhar Mahmood: Thank you for having me. Managing VVIP movements is always a challenging task, especially when we are coordinating the logistics for international teams and dignitaries. When the Sri Lanka A team visited Rawalpindi for their cricket matches, the key was meticulous planning and coordination. We had to ensure that traffic disruptions were minimized, and the public's access was not hindered. The support from my team and the cooperation from other departments made this event a success.

Q: During these events, managing a large number of staff on the field can be a daunting task. How has the new canteen facility, initiated by the Chief Traffic Officer, helped in this regard?

DSP Azhar Mahmood: Yes, feeding hundreds of staff members working in the field is always a logistical challenge. However, the new canteen at the Traffic Head Office has been a game changer. With its modern amenities, it ensures that our staff is well-fed and energized during these busy times. The canteen's ability to prepare meals in bulk and provide quality food on-site has made a tremendous difference, particularly during high-profile events like the SCO summit and the Sri Lanka A team's visit. The staff now feels more supported, and it helps maintain morale and focus during critical operations.

Q: Lastly, what does it mean to you to be leading such significant operations, and how do you ensure the continued success of VVIP management in Rawalpindi?

DSP Azhar Mahmood: It's an honor to lead these operations and ensure the safety of both the public and the VVIPs. The success of these events is a result of teamwork, preparation, and coordination. We always aim for continuous improvement, and every event teaches us something new. It's about anticipating challenges and having a proactive approach to solving them. I'm proud of my team, and I'm committed to further enhancing our capabilities to handle future events smoothly and efficiently.

TRAFFIC EDUCATION AND ANTI-SMOG CAMPAIGN

The Education Wing of the City Traffic Police Rawalpindi has been actively engaging with the community to promote road safety awareness. As part of its extensive outreach efforts, the wing visited various colleges, schools, and bus stops throughout the city to conduct on-road awareness sessions. These sessions were designed to educate students, teachers, and the general public about the vital importance of following traffic rules, understanding road signs, and practicing safe behaviors while on the road.

By interacting directly with people in their everyday environments, the Education Wing aimed to instill a strong culture of safety and responsibility. This drive not only helped reinforce essential traffic safety knowledge but also fostered a sense of shared responsibility among citizens to contribute to safer road conditions. Through these initiatives, the Education Wing is playing a crucial role in creating informed and conscientious road users, thereby contributing to the overall safety and well-being of the community.

In November, the Education Wing of City Traffic Police Rawalpindi launched an extensive Anti-Smog Campaign aimed at raising awareness and combating the harmful effects of smog in the city. The campaign involved staff visiting numerous PSV bus stops, where they interacted with commuters and distributed informative pamphlets about the dangers of smog and the steps citizens can take to protect themselves. In collaboration with a private medical com-

pany, the department also organized an informative session on smog, educating the public about its health impacts and preventive measures. Further, a traffic walk was held to promote environmental consciousness, and plants were planted at various locations in Rawalpindi to help mitigate the effects of air pollution. To directly protect the public, masks and hand sanitizers were distributed to commuters and pedestrians. Through these multifaceted efforts, the City Traffic Police Rawalpindi has made significant strides in promoting a cleaner, healthier environment and encouraging responsible behaviors to fight smog in the city.

ACKNOWLEDGEMENT OF TRAFFIC ASSISTANTS SERVICES

The Chief Traffic Officer has also been actively engaging with young Traffic Assistants, organizing motivational meetings and recognizing their dedication through regular rewards. These efforts aim to boost morale and encourage exemplary performance among the team. In November, **82** Traffic Assistants were recognized for their outstanding performance and rewarded with CC3 and cash prizes by the Chief Traffic Officer. These regular acknowledgments serve as a testament to the department's commitment to fostering motivation and dedication among its young team members.

INCLUSION OF TWO NEW SCOOTIES IN WOMEN ON WHEEL PROGRAM

The Women on Wheel program, dedicated to empowering women through motorcycle training, continued to make significant strides in November with its ongoing initiatives at the Police Lines Rawalpindi and the Divisional Girls Guide Center. As part of the program's expansion, two new scooties were added to further enhance the training experience, offering more opportunities for women to participate. Now total number of scooties in WOW program is four. Furthermore, 33 females registered themselves in WOW program in November. This initiative is a testament to the City Traffic Police's commitment to promoting gender mobility, and road safety by providing women with the skills to become independent and responsible road users, contributing to a safer and more inclusive driving culture in Rawalpindi.

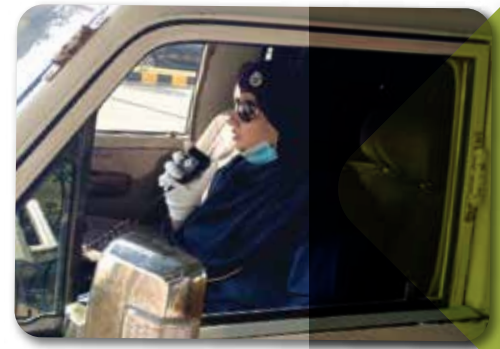

REWARD FOR DEDICATED SERVICE

In recognition of the exceptional dedication and performance of its staff, the Chief Traffic Officer of Rawalpindi awarded **188** CC3 commendation certificates along with a total reward of **1185000** PKR to deserving personnel in November. This reward was distributed among **31** Senior Traffic Wardens, **53** Traffic Wardens, and **16** Senior Traffic Assistants and **82** Traffic Assistants and six ministerial staff, acknowledging their outstanding efforts in ensuring road safety, enforcing traffic laws, and serving the public with diligence and professionalism. The Chief Traffic Officer's initiative highlights the importance of motivating staff through recognition and rewards, fostering a culture of excellence within the City Traffic Police. These incentives not only honor the hard work of the officers but also inspire continued dedication to maintaining order and safety on Rawalpindi's roads.

APPOINTMENT OF FEMALE OFFICERS AS ADDITIONAL CIRCLE OFFICERS & DRIVING INSTRUCTORS

For the first time in the history of the City Traffic Police Rawalpindi, female officers have been appointed as Additional Circle Officers. This groundbreaking initiative not only highlights the department's commitment to empowering women but also sets an inspiring precedent for gender equality in law enforcement. Similarly, in a historic move for the City Traffic Police Rawalpindi, the Chief Traffic Officer has appointed lady instructors at the driving school for the first time. This initiative aims to create a comfortable and encouraging environment for female students learning to drive motor cars.

APPOINTMENT OF CIRCLE OFFICER KAHUTA FOR FIRST TIME

The Chief Traffic Officer Rawalpindi has appointed Circle Incharge for first time in Kahuta to address and resolve all traffic-related grievances in the area. This initiative is designed to improve road safety, streamline traffic flow, and ensure timely solutions to the public's concerns. The Circle Incharge Kahuta, Khuram Fiaz, is committed to working closely with the community to understand and tackle the challenges faced on the roads. We encourage residents to actively participate, voice their issues, and collaborate with us for a smoother and safer traffic experience.

STARS OF CTP RAWALPINDI

MAHNAZ AKHTAR

Mahnaz Akhtar, a dedicated Lady Traffic Warden, has been a trailblazer in empowering women through the "Women on Wheel" program. Mahnaz's commitment to promoting road safety and women's independence on the roads is truly inspiring. Her patience, expertise, and approachable demeanor make her an outstanding instructor, helping women overcome their fears and gain the confidence to ride.

SHAFaq ZAHID

Lady Senior Traffic Warden Shafaq Zahid has been making remarkable strides in her role as the Additional Circle Officer for Dhoke Syedan. Once a hub for parking, street vendors, and Suzuki stands, the area has undergone a significant transformation under her leadership.

Through her dedication and strategic approach, Shafaq has successfully cleared the area of these activities, ensuring smoother traffic flow and improved public safety.

TAHIRA KANWAL

Lady Senior Traffic Warden Tahira Kanwal, currently posted as the Additional Circle Incharge of Cantt, has been making a significant impact in managing traffic congestion, especially during peak school hours. The Cantt area, home to numerous schools, often faced severe traffic bottlenecks during school arrival and departure times. However, under Tahira's active supervision and effective traffic management strategies, these challenges have been efficiently addressed. Tahira's exceptional leadership and proactive approach have earned her the admiration of the community, who now enjoy a much safer and less congested environment during busy school hours.

CITY TRAFFIC POLICE RAWALPINDI NEWS LETTER

Traffic police plan operation against illegal, fancy number plates

By Mohammad Asghar

RAWALPINDI Punjab traffic police chief has expressed concern over increasing number of unauthorised and fancy number plates on motorcycles, cars and other vehicles which makes it harder for the police to identify the vehicles involved in crimes and traffic accidents.

In a directive to all Chief Traffic Offices, including CTO Rawalpindi and District Traffic Officers across the province, the Additional Inspector General of Police Punjab Mirza Parvaiz Ilqam made it difficult for the police to identify the vehicles engaged in crimes and traffic accidents and also presents a security risk enabling offenders to escape justice.

Syed Ghausfar Ali Shah (IGP HQ) on behalf of the AIG traffic directed the CTOs and District Traffic Officers to coordinate with Excise and Taxation Department in district level to launch a joint campaign against illegal and unauthorised number plates and unregistered vehicles.

He said in his directive that some vehicles are seen using 'Applied FaciAPL' number plates whereas few vehicles have partially or fully hidden number plates.

This he said was not only a traffic in itself but also hampered the enforcement of various traffic laws. Wrong, incomplete, or unreadable alphabets or digits on number plates create difficulties in identifying the vehicle that is involved in any incident, road accident or crime.

Similarly, smart enforcement through the e-challenging system by Punjab Safe Cities Authority is also undermined because of use of such unauthorised registration plates. He further said that this illegal practice poses serious security risks, enabling vehicles to escape justice and endanger public safety.

The AIG directed the CTOs and district traffic officers to take all effective measures to curb this malpractice forthwith. Apart from strict legal action against delinquent drivers, the manufacturers of unauthorised and fancy number plates may also be proceeded against.

Crackdown on smoke-emitting vehicles

Our correspondent

RAWALPINDI: The City Traffic Police Rawalpindi intensified its campaign against smoke-emitting and non-compliant public transport vehicles. Acting on the directives of Chief Traffic Officer (CTO) Rawalpindi, the police have issued 10,814 challans since August 25, 2024. These include 5,060 tickets for route permit violations, 4,875 for fitness certificate violations, and 879 for driving without a license. Additionally, suspension papers for 27 vehicles were submitted to relevant departments, and cases were filed against drivers of 52 public transport vehicles. A total of 1,666 vehicles were impounded across various police stations, with fines totalling Rs11,693,000 imposed.

The campaign expanded in September 2024 to target vehicles with engines over 14,000 cc, as they contribute significantly to smog. So far, 5,942 challan tickets have been issued to drivers of these vehicles, with fines amounting to Rs11,884,000.

In a separate campaign focusing on school van safety, the City Traffic Police have checked 6,388 vehicles. As a result, 2,382 challans have been issued, fines totalling Rs2,308,050 imposed, and 136 vehicles impounded across different police stations.

7th December 2024
Beech Fatima,
Chief Traffic Officer,
Rawalpindi
Subj: Appreciation for the Efforts of Your Team in Sadder Cantt
I wanted to take a moment to commend you and your team for your continued efforts. Two years ago, when I was coordinating community activities during religious events, we received tremendous support from your team, and it's evident that the same level of commitment remains today.
Although I no longer coordinate religious events, I can confidently say that the officers based in Sadder Cantt is always responsive and proactive. The leadership you provide plays a crucial role in ensuring the positive environment for the community, which is often challenged by various environmental issues.
While the people in the area are not without fault, often displaying inconsiderate and a lack of civility, the dedication and hard work of your team is clear. Your presence offers a much-needed sense of relief in a context where personal short-temper gets gains sometimes overshadow the larger societal good.
Wishing you and your team all the best.
Warm regards
(Signature)

Many thanks to City Traffic Police for arranging such an informative trip for St. Mary's College. Prayers and blessings
